

Sanofi Innovation Awards (*iAwards*)

Sanofi, a global leader in healthcare is pleased to launch the call for iAward pre-proposals

Collaborate with us and receive seed funding to progress your promising human disease relevant research to the clinic to benefit patients

Sanofi Innovation Awards (iAwards)

Sanofi is a leading global healthcare company engaged in bringing innovative therapeutic solutions to meet the needs of patients.

Sanofi iAwards program is a multi-institutional academic partnership program designed to collaborate with academic investigators to quickly move promising early stage, disease relevant, innovative research towards the clinic. Seventeen premier academic institutions across North America are currently participating in this program. The academic partners are: Brigham and Women's Hospital, Columbia University, Johns Hopkins University, Massachusetts General Hospital, Boston Children's Hospital, University of Pennsylvania, Weill Cornell Medical Center, Stanford University, UCLA, UCSF, New York University, Northeastern university, Children's Hospital of Philadelphia, Dana Farber Cancer Center, Sinai Health (Toronto), Sunnybrook Health (Toronto) and University Health Network (Toronto).

Through this program, Sanofi aims to fund innovative and translational research ideas that can contribute to our early stage pipeline and ultimately benefit patients. The selected proposals will receive:

- **\$125,000 research funding (including institutional indirect costs) for 12 months**
- **Sanofi scientific expertise and guidance**
- **In-kind resources such as reagents, tool compounds, etc. may be provided**
- **Successful projects could be converted to SRAs and receive additional funding for 2-3 years**

Sanofi Innovation Awards (iAwards)

Call for pre-proposals:

Sanofi is requesting pre-proposals from academic investigators in the participating institutions in multiple therapeutic areas including, immune-oncology, molecular oncology, immunology & inflammation, rare diseases, neurosciences, diabetes and cardiovascular diseases. In addition, pre-proposals in technology areas including gene therapy, single-cell analysis and biologics development will also be considered.

A copy of the pre-proposal template is attached and additional information on therapeutic areas of interest is provided below. Only the JSSC and select members of Sanofi and your Institution will have access to your pre-proposal. However, information in the pre-proposal is **NOT** considered confidential and therefore unpublished information should not be disclosed in the pre-proposal. Proposals with third party collaborators other than those from partner institutions within the iAwards Program will not be considered.

Please limit your completed pre-proposal to two pages, excluding publications.

Please email your completed pre-proposal to: techventures@columbia.edu

The deadline for submission of your pre-proposal is 15th, September, 2018.

Sanofi Innovation Awards (iAwards)

Areas of Interest:

Sanofi is seeking the following type of opportunities in the therapeutic areas provided below -

- New and actionable knowledge about disease relevant targets, pathways and mechanisms
- Early stage compounds or biologics targeting novel disease mechanisms
- New models for validating disease relevant targets
- Technology platforms with the potential to significantly improve drug discovery and development (examples – gene therapy, biologics development)
- Novel therapeutic modalities

IMMUNOLOGY & INFLAMMATION

- Diseases associated with dysregulated Type 2 immune responses including Atopic Dermatitis and Asthma
- Rheumatological disorders including Lupus Erythematosus, Rheumatoid Arthritis, psoriatic arthritis and Ankylosing spondylitis
- Autoimmune sequelae of checkpoint inhibition
- Co-stimulation pathways in autoimmune and allergic diseases
- Systems Immunology and single (immune) cell analysis
- Immuno-metabolism

RARE DISEASES

- Gene Therapy
- Inherited metabolic diseases
- Rare neuromuscular, neurometabolic, nephrological, bone and hematological diseases

CARDIOVASCULAR

Cardiomyopathies

- HCM, DCM and other cardiomyopathies

Heart Failure

- HF-preserved ejection fraction (HFpEF) and HF-reduced EF (HFrEF)
- Acute HF

Atherosclerotic Vascular Disease

- Microvascular disease
- Peripheral artery disease
- Coronary artery disease

Sanofi Innovation Awards (*iAwards*)

NEUROSCIENCES

- Novel targets / assays for proteinopathies, in particular for tau- opaties, but also a-synuclein,TDP-43
- Remyelination targets and assays, including human iPSC based assays
- Neuroprotection in neurodegenerative diseases including MS, PD, ALS
- Novel targets / models for rare genetic diseases of the central nervous system and peripheral nervous system, including gene therapy approaches
- Microglial biology, in particular in inflammatory milieu
- Blood brain barrier biology, transport mechanisms and neurovascular unit biology
- Biomarkers and imaging methodologies to facilitate disease diagnosis, progression and therapeutic efficacy, or patient stratification, for MS, PD and other neuro- degenerative diseases
- Novel targets to preserve synapse number and function in neurodegenerative diseases, including MS
- Novel targets for CNS insulin resistance, cholesterol homeostasis, and ApoE4 correction

IMMUNO-ONCOLOGY (IO)

- Systemic oncolytic viruses
- Immune cell engagers
- Immuno-conjugates
- Novel ADC targets
- Intra-tumoral Treg depletion, modulation of immunosuppressive myeloid lineages
- DC maturation, improved cross-presentation
- Immune profiling methodologies in preclinical and clinical setting
- Novel translational models in IO

MOLECULAR ONCOLOGY

Sanofi priority indications are breast, lung, head and neck, gastro-intestinal, prostate, leukemia, multiple myeloma.. Pancreas and liver cancers

- Novel targets and/or early drug discovery projects in molecularly-defined cancer populations and/or lineage
- Small molecule or biologics targeted therapy programs
- Novel Targeted therapy approaches
- Tumor microenvironment targeting programs

Sanofi Innovation Awards (iAwards)

DIABETES

- Glucose responsive insulins
- Obesity; NAFLD & NASH
- Diabetic Kidney disease
- Beta cell protection &/or regeneration
- Diabetic heart failure & cardiomyocyte fuel utilization
- Novel delivery technologies of large molecule drugs (preferably oral)
- Insulin resistance

BIOLOGICS RESEARCH

- Specific tissue delivery of biologics
- In silico design / Computational biologics
- Intracellular biologics
- Multi specific protein formats

Sanofi iAwards General Timeline

Action	Due Date
Issuance of Request for Pre-Proposal by Institution	1st August
Submission of completed Pre-Proposals to Institution	15th September
Notification by Sanofi of pre-proposals chosen to be pursued as Detailed Proposals	15th October
Completion and submission of Detailed Proposals	5th November
JSSC meets to review Detailed Proposals	Late November
Institution informed of JSSC funding decisions	Early December
